## Instructions For All UC-1, 2, and 3K series filters

### 1) SHUT OFF COLD WATER SUPPLY

- Place CuZn™ Water Filtration System under counter. Note location of inlet and outlet holes. (If hanging the unit make sure to leave at least 3" of clearance beneath the filter to access and change the cartridges.)
- Disconnect the cold water supply tube from shut-off valve. (Leave the connection to the faucet in place.)

### For units without third faucet (connected directly in the cold water line)

- Carefully bend that existing tube and connect it to the outlet of your new CuZn Filter.
- Connect the 3/8" flexible stainless tubing (included) from the inlet of your CuZn filter to the water supply at the shut off valve.
- Turn on water supply. Check for leaks.

### For units including a third faucet

- Connect the female side of the included **T** to the incoming line at the shut off valve.
- Connect the pre existing tube (still connected to your faucet) to the top 3/8" male fitting of the **T**
- Connect one of the included 1/4" flexible stainless tubes from the male 1/4" fitting on the **T** to the inlet side of your CuZn Filtration system
- Place (included) third faucet in position on your sink. (A 15/32" hole may need to be drilled in your sink if it is not equipped with an additional place for the extra faucet.)
- Connect the second 1/4" flexible stainless tube from the Outlet of your new CuZn Filter to the bottom of the third faucet.
- Turn on water supply. Check for leaks.

Connections should be tightened securely but not overtightened. If leaks persist, turn water supply back off, disconnect, and apply sealant to leaking joint. Not all piping arrangements are the same. If supplied parts are not enough to make the appropriate connections, obtain what is needed at a local hardware or plumbing supply store.

Turn cold water on and run through your filter for at least five minutes or until water is clear, to remove any media dust or carbon fines. **Drink in good health!**

### Limited Warranty

This CuZn filter is designed for use on potable systems only. Its effectiveness may be reduced in areas where municipally treated water has chemicals such as polyphosphates to alleviate water problems caused by high iron content. Do not use this filter in water supplies that may reach pressures over the recommended use stated on the instructions. The manufacturer warrants this product to be free from defects in materials and workmanship when installed, operated, and maintained in the manner instructed, for a period of one year from date of purchase. The warranty is limited to the repair or replacement of any filter that fails to perform due to faulty materials or workmanship during the warranty period. To qualify for this warranty, the filter must be maintained and replaced as stated in the instructions. Save your receipt. CuZn is not responsible for any damages occurring during the misuse of this product.
